20. ABSTRACT (Continue on reverse side if necessary and identify by block number)  This report (1 January-31 March) is one of a regular series on the status and progress of studies on the nature of speech, instrumentation for its investigation, and practical applications. Manuscripts cover the following topics:  -Phonological awareness: The role of reading experience -An investigation of speech perception abilities in children who differ in reading skill -Phonological and morphological analysis by skilled readers of Serbo-Croatian -Visual and production similarity of the handshapes of the American Manual Alphabet -Morphophonology and lexical organization in deaf readers
