Reports and Oral Presentations

K. S. Harris. Speaker/participant in "Interdisciplinary Perspectives of Language and Language Pathology." Annual meeting of the New York State Speech and Hearing Association, 29 April 1975.

D. Shankweiler. On Accounting for the Poor Recognition of Isolated Vowels. Presented at the 89th meeting of the Acoustical Society of America, Austin, Texas, 10 April 1975.

Varieties of Memory. Colloquium presented to the Northeast Ontario Mental Health Center, Canada, March 1975.

Some Thoughts on Action with Reference to Vision. Colloquium presented at the University of Toronto, Canada, March 1975.

Some Thoughts on Action with Reference to Vision. Colloquium presented at the University of Illinois, April 1975.

Perspectives in Vision. Invited address at annual meeting of the Orton Society of New York, April 1975.

This report (1 January – 31 March 1975) is one of a regular series on the status and progress of studies on the nature of speech, instrumentation for its investigation, and practical applications. Manuscripts cover the following topics:

-Preliminaries to a Theory of Action with Reference to Vision
-Two Questions in Dichotic Listening
-Relationship of Speech to Language
-Rise Time in Nonlinguistic Sounds and Models of Speech Perception
-Phonetic Coding of Words in Taxonomic Classification Task
-On the Front Cavity Resonance, and Its Possible Role in Speech Perception
-Synthetic Speech Comprehension: Comparison of Listener Performances with and Preferences among Different Speech Forms
-Testing Synthesis-by-Rule with OVEBORD Program
-Stress and the Elastic Syllable: Delineating Lexical Stress Patterns in Connected Speech
-VOT or First-Formant Transition Detector?
-Pitch in Perception of Voicing States in Thai: Diachronic Implications
-Facial Muscle Activity in Production of Swedish Vowels: An EMG Study
-Combined Cinefluorographic-EMG study of the Tongue during Production of /s/: Preliminary Observations
-Velar Movement and Its Motor Command
-The Stuttering Larynx: An EMG, Fiberoptic Study of Laryngeal Activity Accompanying the Moment of Stuttering
